

## Instructions for mounting the foot on the base plate

Find a place in the sun for your sundial. A place where the sun shines as long as possible and no trees or buildings cast shadows. Place the base plate there.

The next step is to fix the foot plate with M8 x 16 screw and washer on the base plate. If the foot plate and base screw are pre-assembled, then first loosen the three screws and remove the foot screw first.

After fastening the foot plate, place the foot screw in the tapered seat of the foot plate and loosely screw in the three screws (M6 x 12) with the spherical washers.

Align the foot screw so that the air bubble of the spirit level is inside the black ring.

Now press the foot screw firmly into its seat with one hand while tightening the screws with the other hand.

Slip the foot cover over the foot screw and screw the stand onto the foot screw. For more information, refer to the „Instructions stand mounting“.

Please refer to the sundial manual for the steps necessary to assemble the sundial.
